For Your Attention

Statements based on type: The following statements in the report are based on scales or patterns that use the client's reported type: **A7, LI42A**

If the person's reported type and best-fit type are different, the client may question the accuracy of these statements. The perceived accuracy of these statements may also be affected by any preference clarity categories in the **slight** range. If the client questions the accuracy of these statements, the interpreter should review them and discuss them with the client.
